

When Storms Strike, We'll Be There

**MESSAGE
FROM
MANAGER
JERRY D.
WILLIAMS**

By the time you read this, most folks will have almost forgotten about the big snow in February. I grew up in the Kiamichi Mountains on the other side of the Red River and expected a little snow every winter, but I can't remember ever seeing as much snow in this area as we had on February 12. Lamar Electric crews worked all night to restore power to the hardest hit areas. I found the deepest snow in the northern part of Red River County.

A light snow will not usually cause the electricity to go off. In this case, the pine and cedar branches bowed over onto the electric lines as over 12 inches of snow (in some areas) weighted them down. In some cases, we were able to cut the limb off or shake it until it dropped its load. Of course, as it continued to snow, several electric lines went back off. We had to restore power to some areas three times. Unfortunately, some of the electric lines burned down before the fuse blew and turned the power off.

I saw several instances where tree limbs have been allowed to remain too close to the main high-voltage wires. Some of these situations were in or near front yards, and the crews reported that when our right-of-way crews came through in the past, the landowner had objected to the limbs being cut back as they should have been. This is just not fair to their neighbors. I love trees, but tree limbs and high-voltage electric wires just do not mix. This is why Lamar Electric secures a signed easement before we build an electric line. Many times these easements were signed many

years ago, and the land has changed hands many times, but the easement is still valid. We all have to figure out how to get along, but for the sake of your neighbors and my sanity, I would ask you to be cooperative when the crews arrive to cut tree limbs.

Some of our past right-of-way procedures came back to haunt us. Some landowners related how in the past they asked the right-of-way crew to just cut a particular tree down, rather than trim a few limbs. At the time, our contracted right-of-way crews were being paid a set price per foot to trim limbs within 10 feet of the line and were following orders when they declined to remove the whole tree. This problem has been fixed, but it is going to take awhile to get around to all 2,000 miles of electric line.

George Scroggins and Casey Martin

After such a cold and wet winter, many of us are glad to see the return of warmer weather. If forecasts are right, this spring should be wetter than usual in Texas. Usually, with more rain comes a bigger chance of severe spring storms. And with those storms often come lightning and downed limbs and trees. Those are the two biggest causes of power disruptions on our system.

We hate to think that any of our members will have to go through the inconvenience of a power outage, but we know that in a severe storm, that situation is almost a certainty. If your electricity does happen to go off at your home or business, we at Lamar Electric

want to remind you of a few things:

First, give us a call at (903) 784-4303 and let us know your power is out. You may be on hold for a while, so please be patient. We'll send repair crews as soon as possible, and they will continue to work until your lights are back on. Depending on the severity of the outage, this could take several hours; so make sure you have supplies such as flashlights, candles or lamps on hand.

Also, do yourself a favor and turn off everything in your house but a porch light. Then, when power is restored, a power surge from all your electronics turning on at once won't damage your sensitive equipment.

By leaving a porch light on, it will signal to our linemen in the field that your house's power has been restored. Once the power is back on, you can go back through your home and turn on needed appliances and lights one by one.

Please, above all, be safe. If you see downed power lines, stay away from them. Call us and call 911 to let public safety authorities know so they can help keep the area clear.

If the outage is a long one and you decide to use a portable generator, know the rules for operating it safely. Don't plug directly into your house's wiring. That can cause a dangerous condition known as backfeeding that can send electricity onto power lines, injuring or killing the linemen working to restore your service. Instead, plug individual appliances into the generator using an extension cord. Also, make sure to operate it in a well-ventilated area outside to avoid a buildup of deadly carbon monoxide gas.

Let's hope severe storms don't strike our area this spring. But if they do, we are prepared to do whatever it takes to restore your service.

At Lamar Electric Cooperative, we take pride in delivering the best possible service at an affordable price. That includes prompt service whenever an outage strikes.

NOTICE

of

LAMAR COUNTY ELECTRIC
COOPERATIVE ASSOCIATION

MEETING OF MEMBERS

The Annual Membership Meeting of Lamar County Electric Cooperative Association will be held at the Paris High School Auditorium, 2400 Jefferson Road, Paris, Texas, on Saturday, April 17, 2010.

Registration opens at 9 a.m. The business session will begin at 10 a.m. and includes any necessary reports of the officers, board members and committees as well as the election of board members in Districts 2, 3 and 4, each for a three-year term.

In order for a member to be nominated for a position of director of the Cooperative, his/her name must be officially received at the main office of the Cooperative not less than sixty (60) days nor more than ninety (90) days before the date of the annual meeting of the members at which board members are to be elected.

The following members have placed their names in nomination at the Cooperative Headquarters:

DISTRICT NO. 2

Mark G. Jones, 380 Private Road 42495, Paris, TX 75462

DISTRICT NO. 3

I.B. (Barney) Chapman II, 23110 Farm Road 1159, Clarksville, TX 75426

Billy R. Hines, 1680 Farm Road 1159, Clarksville, TX 75426

DISTRICT NO. 4

Billy F. Bratton, 1484 County Road 4417, Annona, TX 75550

Charles N. Dooley, 632 Farm Road 1701, Annona, TX 75550

You do not have to be present at the meeting to vote in the director election. Prior to the meeting, ballots will be mailed to members who reside in those districts. If you reside in one of the districts having an election, you may either vote by mail or in person at the meeting.

Each member in attendance at the meeting will receive a registration gift, and a drawing for other prizes will be held. You must be present at the time of the drawing to be eligible for door prizes. In addition, two \$1,000 scholarships will be awarded at the meeting.

Billy R. Hines
BILLY R. HINES, Board Secretary

Dated: March 25, 2010
